

GX2 POWER

DEFINING MASTERED POWER

Dynamic power that goes beyond raw force. Delivering explosive speed with precise control and finesse.

 **GEARBOX**[®]
Innovative to the Core

A close-up, high-angle photograph of a carbon fiber rib core. The image shows a dense, woven pattern of dark, fibrous material, with a central section where the fibers are more tightly packed and form a distinct ribbed structure. The lighting is dramatic, highlighting the texture and depth of the material against a dark background.

THE FUTURE IS CARBON FIBER RIB CORE

GX2

POWER

From the brand that revolutionized the power rulebook. Introducing the GX2 Power, Gearbox's most powerful legal paddle to date. Experience dynamic power that goes beyond raw force. This is mastered power, combining explosive speed with precise control and finesse.

THE STORY BEHIND THE GX2 POWER

When I set out to create the GX2 Power, my goal was clear. To create a powerful paddle with incredible control: Mastered Power. True power goes beyond hitting hard—it's about controlling the energy, having the right feedback, and knowing exactly where the ball is going. Mastered Power is raw dynamic force, where explosive speed meets the precision of fine-tuned control. I reconfigured the CarbonRibCore™, and suspended it from the frame to increase dwell time, maximize power, and maintain a direct connection between player and paddle.

To achieve this, I optimized the internal carbon fiber rib core, adjusting the fiber orientation, fiber density, and foam pressure in each rib module. This enhances feedback, power, and control, creating a paddle that connects with the player. I also fine-tuned the swing and twist weights to improve hand speed, stability, and balance, giving players a larger sweet spot for consistent control.

Rafael Filippini, Player/Inventor/Engineer

MASTERED POWER.

True power goes beyond hitting hard—it's about controlling the energy, having the right feel, feedback and knowing exactly where the ball is going.

S S T 2.0
CARBON RIB CORE

PATENT# 10.377.093

PATENTS PENDING

The GX2 Power, built with our New SST 2.0 CarbonRibCore™ and a suspended core design— increases dwell time for explosive power, spin, and control. Its advanced carbon fiber structure enhances feel, vibration, and expands the sweet spot for fast, consistent, and precise performance.

4X STRONGER

Than Honeycomb Core Paddles

2X STRONGER

Than Closed Cell Foam Core Paddles

CONTROL THAT RESPONDS TO YOU.

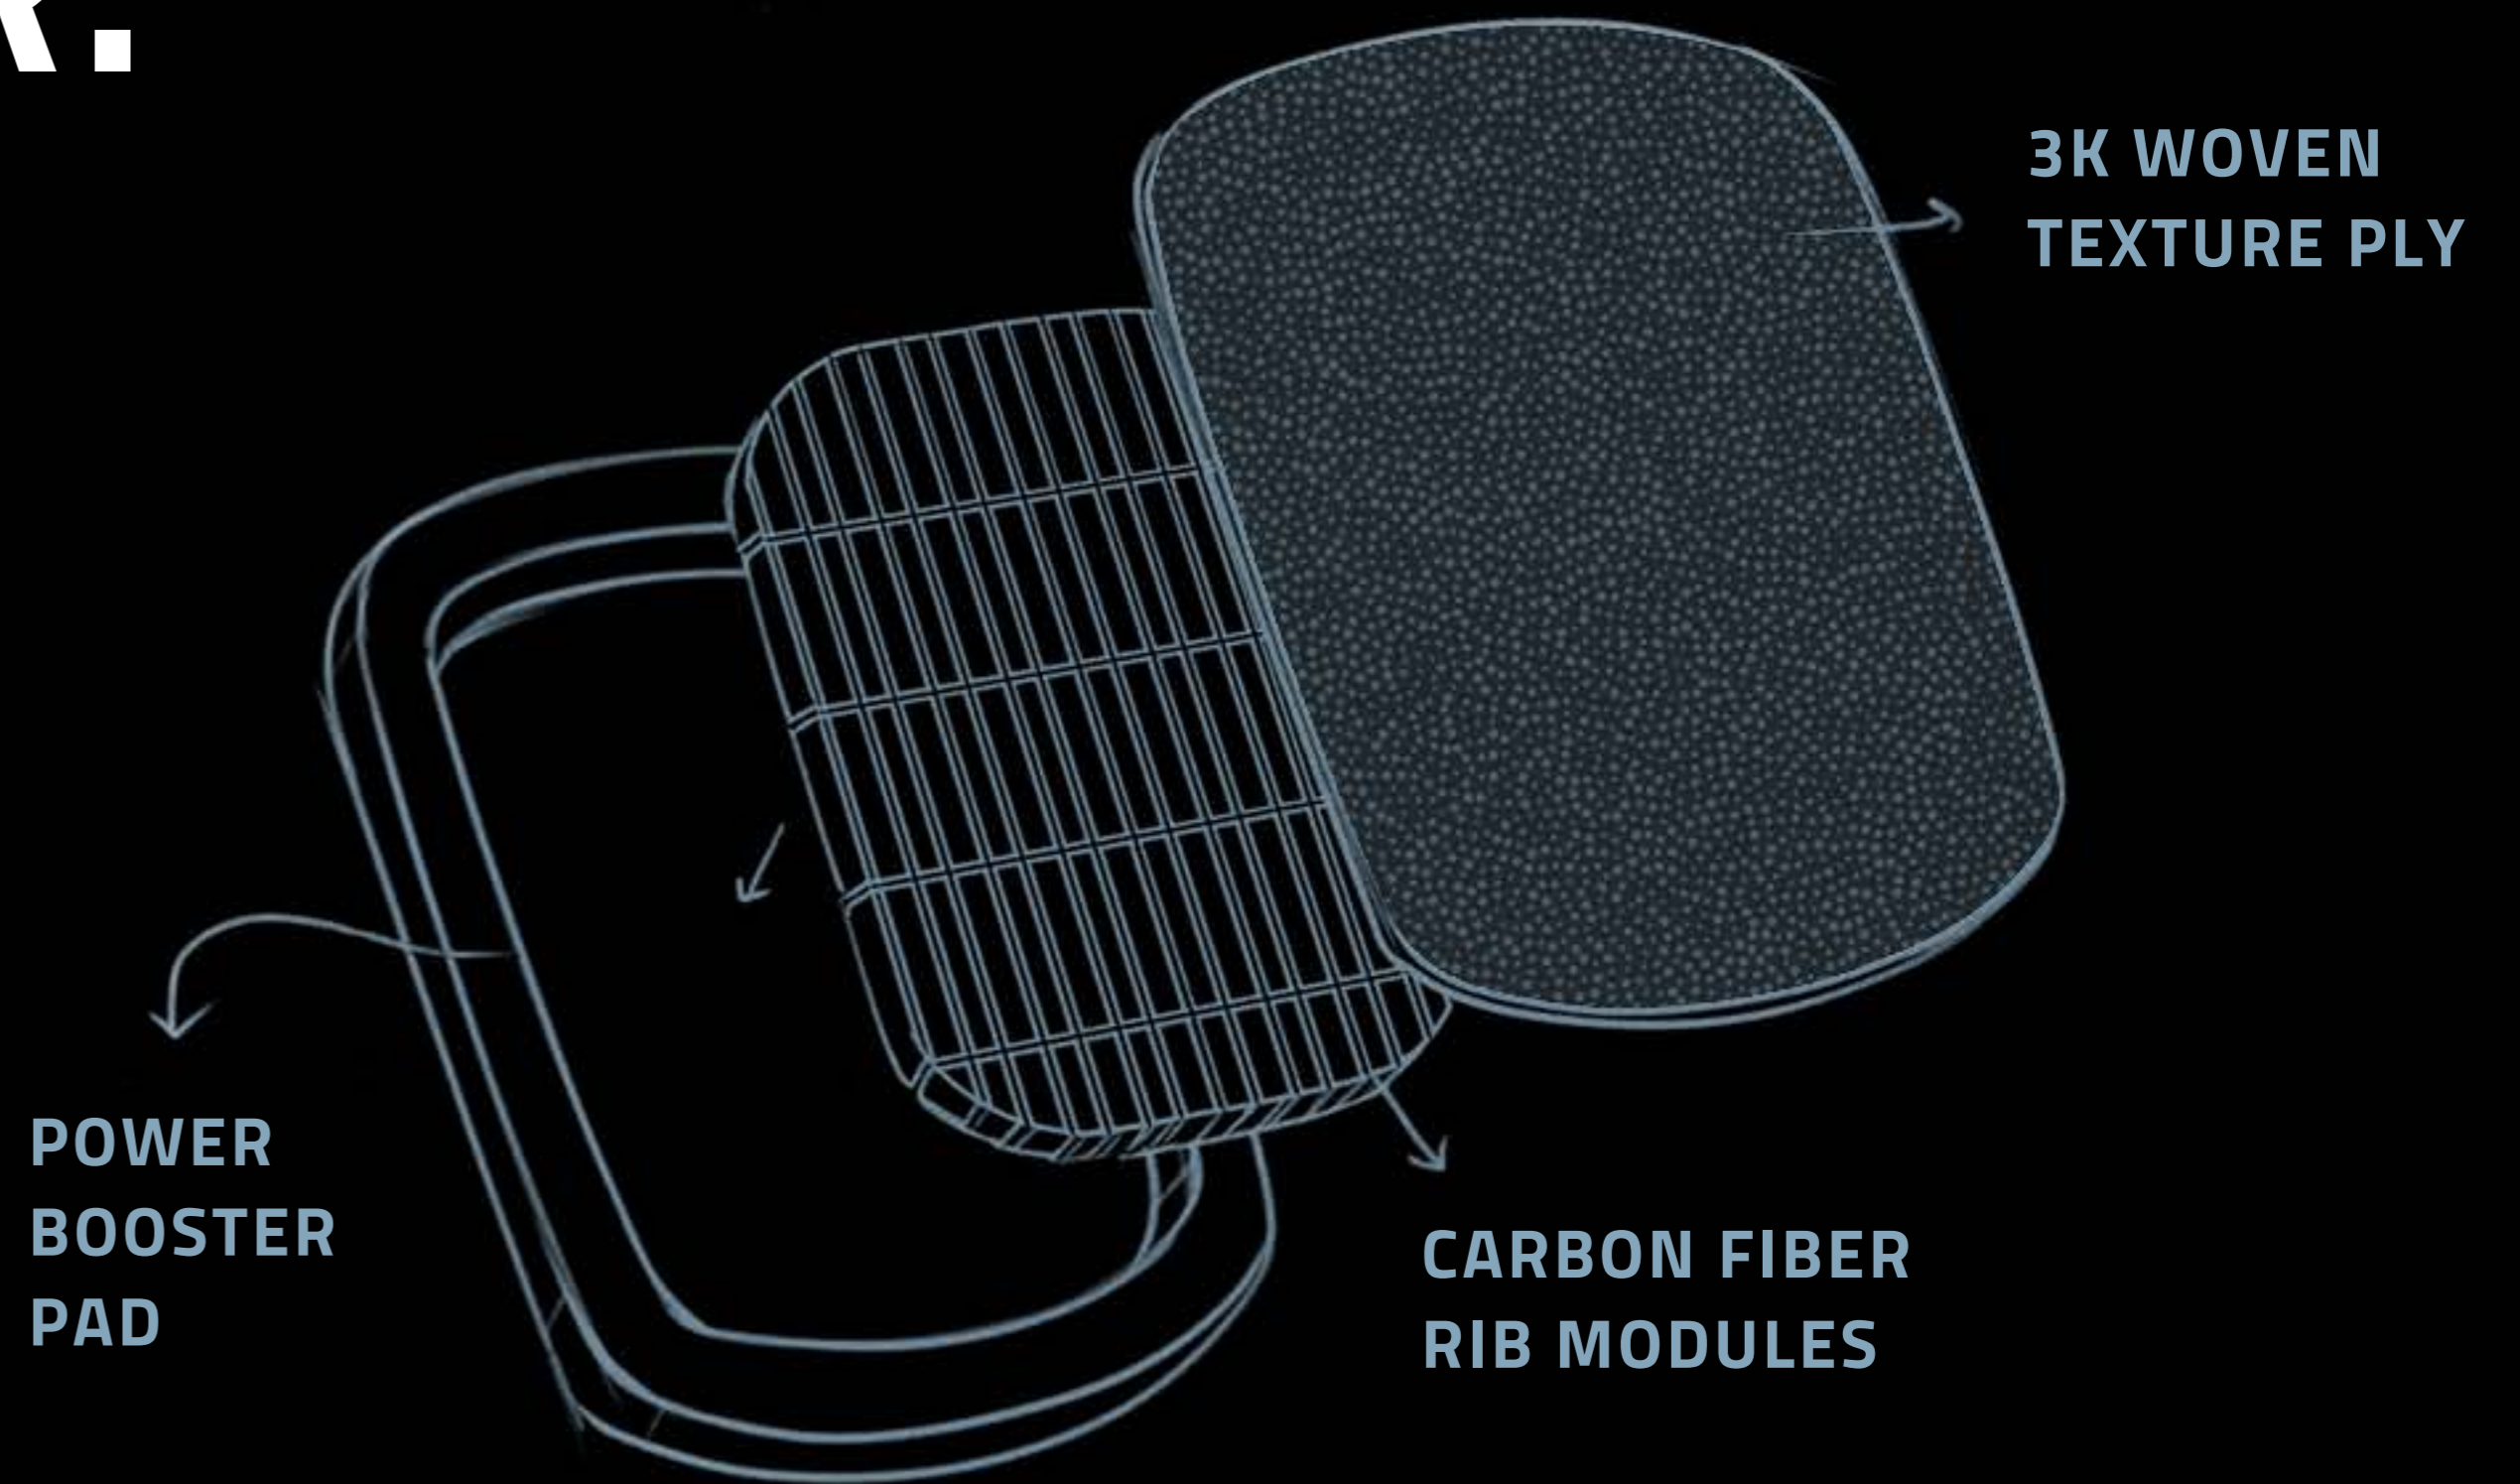

Mastered Power that gives players control over every shot, whether it's a powerful baseline drive, a precise reset, an aggressive dink with spin, a delicate touch dink, or a punch volley.

Gearbox Pro Roman Estareja

MASTERED POWER. INCREDIBLE FEEDBACK.

The internal rib structure has been reconfigured and fine-tuned to enhance sound, pitch, and vibration, strengthening the player's connection to the paddle and allowing them to feel the true power of their shots. This feedback improves control, precision, and overall playing experience.

Gearbox Pro Jasmine Almaguer

The New Re-engineered and

SUSPENDED SST 2.0 CARBONRIBCORE™

Maximizes Dwell Time

At Gearbox, we pioneered the power game, and the GX2 Power continues this legacy. With maximum power, you'll wonder how it's legal.

MASSIVE SWEET SPOT.

The reconfigured carbon fiber ribs and suspended CarbonRibCore™ expands the sweet spot, while the increased twist weight enhances stability and control.

Gearbox Pro **Claudio Quiñones**

SPIN UNLEASHED. PRECISION DELIVERED.

The reconfigured carbon fiber ribs and suspended CarbonRibCore™ increases ball contact time, allowing players to shape shots with incredible spin. Additionally, the carbon fiber ribs, combined with the hitting surface plies, and surface texture, enhances the 'bite' on the ball, maximizing topspin on drive shots.

**BUILT FOR POWER.
BUILT FOR PERFORMANCE.
BUILT TO LAST.**

You don't replace it because it breaks,
you replace it because Gearbox keeps innovating.

PBCoR APPROVED

Play With Confidence

The PBCoR standard ensures your paddle delivers consistent, high-performance power while meeting the latest pickleball regulations for a competitive edge.

Tournament Ready

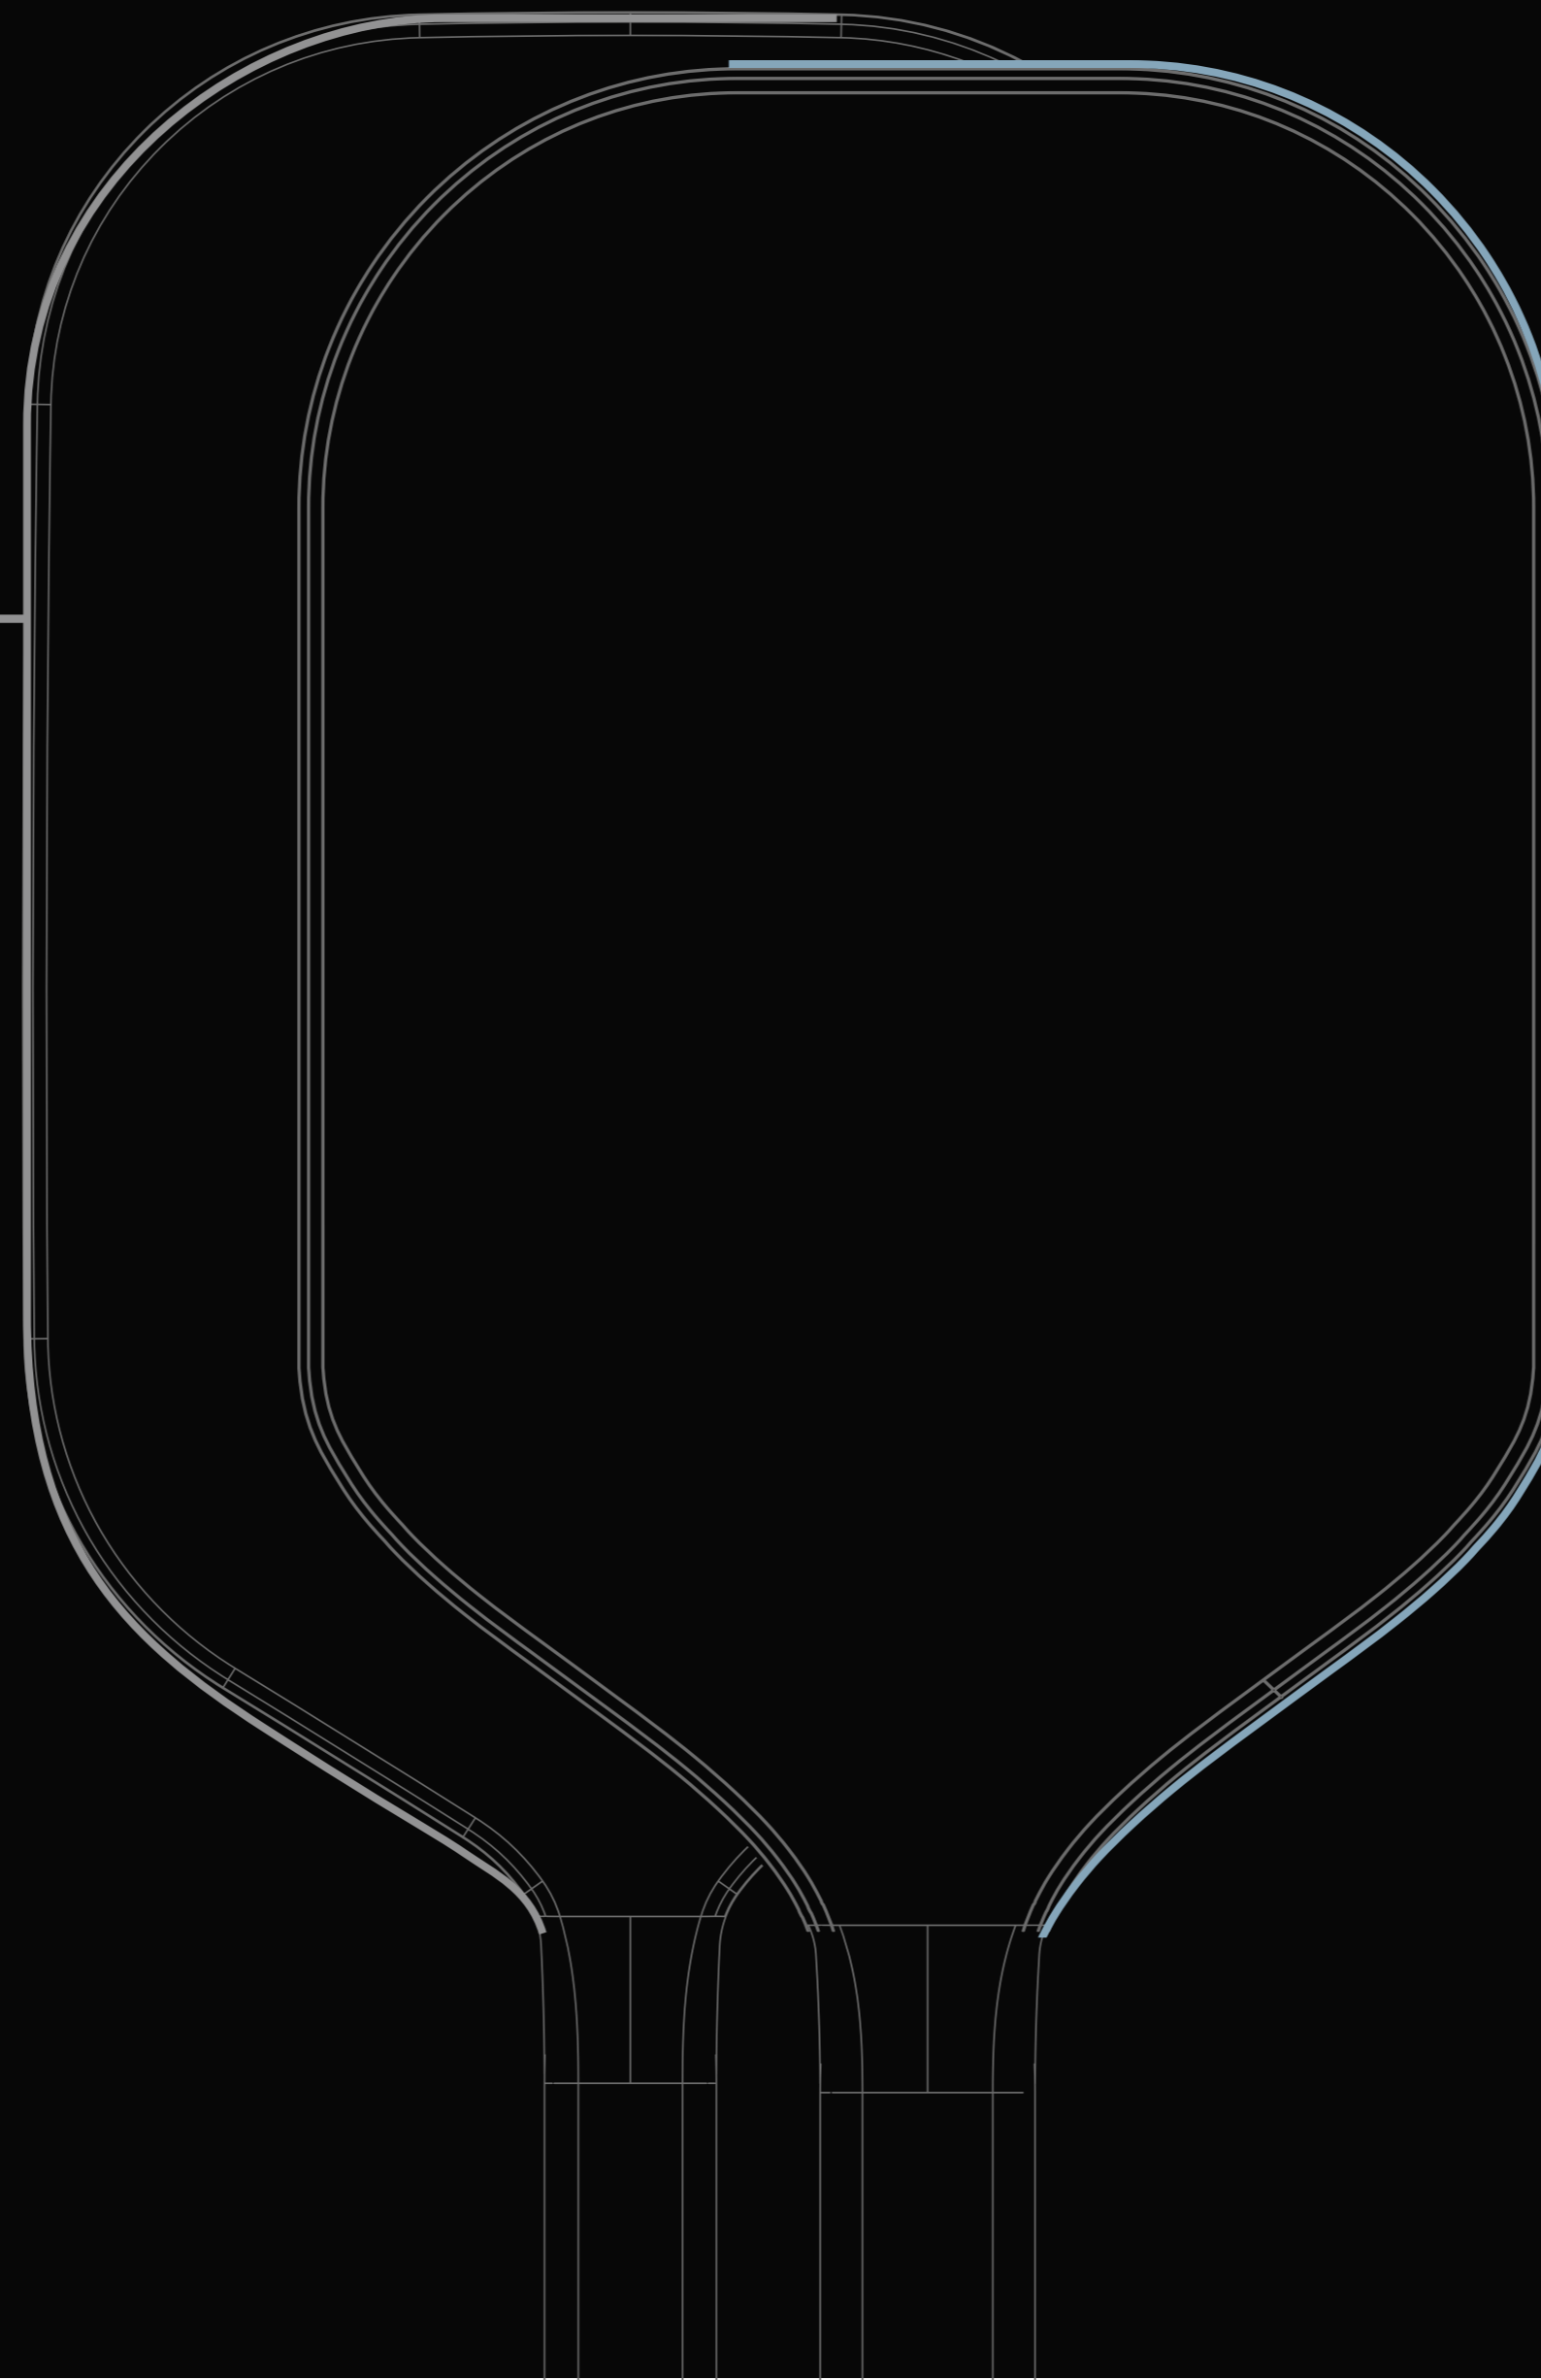

Proudly USA Pickleball Approved, our paddles meet the highest standards for your competitive edge.

Elongated Shape

The Elongated shape is a great shape for those looking for extended reach and power. The elongated paddle, coupled with the extended handle, serves as a smooth transition paddle for tennis players due to its overall length and familiar grip.

Paddle Length: 16 1/2" Paddle Width: 7 3/8"

- More Reach
- Optimizes Power
- Allow For Fast Rolls For Spin
- Longer Handle Accommodates Two-Handed Shots

NEW Hybrid Shape

The all-new Hybrid shape features a redesigned throat area for effortless two-handed shots, offering a natural feel in your hands. This popular shape is engineered for exceptional maneuverability, providing the perfect balance of control, reach, and stability to elevate your game.

Paddle Length: **16.2"** Paddle Width: **7.8"**

- Ultimate Maneuverability
- Precise Control
- Enables Quick Hand Movement
- Longer Handle Accommodates Two-Handed Shots

The Future Is Carbon Fiber.

ONE CORE TO RULE THEM ALL

Beyond Foam, Beyond Honeycomb

CarbonRibCore™

Power: Efficient energy transfer, explosive shots.

Durability: 4x stronger, resists wear and deformation.

Control: Consistent control, even on off-center hits.

Stability: Superior stability during intense play.

Longevity: Maintains performance without degrading.

VS

Foam Core

Limited Power: Lacks the explosive power of carbon fiber.

Degrades Over Time: Loses power and responsiveness with use.

Mushy Feel: Less responsive than carbon fiber.

Durability Issues: Prone to compression and deformation.

Honeycomb Core

Limited Power: Lacks the explosive power of carbon fiber.

Degrades Over Time: Cell breakdown, causing delamination and core crushing.

Inconsistent Performance: Loses energy and requires frequent replacements.

GX2 POWER *ELONGATED*

**EXPLOSIVE POWER,
MAXIMUM REACH,
EXCEPTIONAL SPIN**

The GX2 Power Elongated shape delivers explosive baseline power with extended reach and optimal leverage. Its larger sweet spot enhances control and stability, while the familiar length and grip make it a seamless fit for tennis players.

Elongated Shape

Paddle Face Finish: 3K Woven Raw Carbon

Core Material: 200 FAW - Toray T-700 Mid Modulus Carbon Fiber

Core Construction: Patented SST 2.0 Carbon Fiber Rib Structure

Head Shape: Elongated (E)

Weight: 8.0 oz

Handle Circumference: 4" Grip

Handle Length: 5 1/2"

Paddle Length: 16 1/2"

Paddle Width: 7 3/8"

Paddle Thickness: 16 mm

Grip: Gearbox Smooth Wrap - Black

Warranty: 1 Year (visit gearboxsports.com to register your purchase)

\$279.99

Great for players with a tennis background and two-handed shots

Ideal for baseline drives and aggressive shots

Better reach, control, and stability

Larger sweet spot for consistency

Quick rolls for enhanced spin

NEW SHAPE

GX2 POWER *HYBRID*

**POWER, PRECISION,
MASSIVE SWEET SPOT,
EXCEPTIONAL SPIN**

The GX2 Power Hybrid shape is Gearbox's most versatile paddle, delivering a powerful, controlled, and stable feel with the largest hitting surface in the line. Its generous sweet spot, exceptional spin, and precise shot placement make it ideal for players who want to dominate from the baseline to the kitchen.

NEW SHAPE

Hybrid Shape

Paddle Face Finish: 3K Woven Raw Carbon

Core Material: 200 FAW - Toray T-700 Mid Modulus Carbon Fiber

Core Construction: Patented SST 2.0 Carbon Fiber Rib Structure

Head Shape: Hybrid (HH)

Weight: 8.0 oz

Handle Circumference: 4" Grip

Handle Length: 5 1/2"

Paddle Length: 16.2"

Paddle Width: 7.8"

Paddle Thickness: 16 mm

Grip: Gearbox Smooth Wrap - Black

Warranty: 1 Year (visit gearboxsports.com to register your purchase)

GX2

POWER

CORE TECHNOLOGY

Re-engineered carbon fiber ribs structure and Suspended Core Enhanced Dwell Time for Maximum Power.

POWER DELIVERY

Maximum Power with lower swing weight to maximize swing speed.

SPIN & CONTROL

Suspended core for advanced spin, higher twist weight for stability and control.

FEEL & FEEDBACK

New Fine-tuned sound and vibration deliver strong feedback—connecting feel, sound, and control.

SWEET SPOT

Massive sweet spot with increased feedback and responsive shot shaping.

BEST FOR

Aggressive players seeking maximum power, control, and advanced shot shaping.

GX2

CORE TECHNOLOGY

CarbonRibCore™ attached to the frame for smooth, solid power.

POWER DELIVERY

Plush, controlled power with smooth response and fluid feel.

SPIN & CONTROL

Solid spin and precision with a stable, consistent response.

FEEL & FEEDBACK

Plush, quiet sound with smooth control and less vibration.

SWEET SPOT

Large sweet spot with a forgiving feel for consistency across shots.

BEST FOR

Players seeking a balanced, stable paddle with a smooth, consistent feel with solid power.
